Tips for a Successful Conference

Below are some helpful hints for conducting an efficient and productive Unified Meeting.

- + Prepare in advance. To avoid meeting delays, take time before the conference to create and upload any resources you'll need for your meeting, such as presentations, surveys or quizzes.
- + Enter the meeting early to ensure participants can access your meeting at the scheduled start time. Give yourself a few minutes to open the meeting room and make sure all necessary system components are loaded.
- + When speaking, talk directly into either a headset or telephone receiver for optimal clarity.
- + Mute all participants in non-collaborative meetings to minimize background noise.
- + Be conscious of participant connection speeds, as they may vary. Allow time for transition between slides.
- + For optimal application sharing performance, keep the number of open windows to a minimum.
- + Use annotation tools and include polling and quizzes to promote interactivity.
- + To help participants better understand and recall content, limit presentation materials to six or seven lines per slide. Use larger-sized fonts for legibility.
- + Be sure participants download the Unified Meeting application prior to your meeting if they wish to use certain features such as presenter capabilities and desktop video.

Note: Your participants are not required to download the application to join your meeting.
